

## Phonics for Reading Third Level Fidelity Checklist

In order to know if a reading intervention program has been delivered with fidelity, it is helpful to have a checklist as a guide. This is a tool that intervention teams can use to help monitor the fidelity of Phonics for Reading Third Level.

### Intervention Fidelity

Fidelity is not meant to be a daunting term! Research based programs need to be followed in the way they were designed in order to mimic the guidelines of the studies that showed positive results. Understanding the guidelines and what is expected for instructional delivery is the key to success in every intervention program.

Teacher actions and student actions will guide the fidelity in which interventions are being used. Intervention fidelity will be determined by using the approved checklist for each intervention.

A fidelity checklist can also be used as a self-monitoring form for interventionists as they begin teaching the program. It helps to be a reminder of what are the must dos of the program and what to keep consistent over time. It is also helpful to review the fidelity checklists throughout the school year as an intervention team, possibly during intervention cycle data reviews. This helps to create conversation around key program elements and expectations. Data review time is always a great chance to ask about how is going and a checklist could help provide areas to focus on or improve for the next intervention cycle.

Intervention teams should identify the person(s) responsible for conducting the intervention fidelity throughout the school year. This person should be someone who has been trained in the intervention program and is very familiar with the key components. This person would also be expected to share the feedback from the checklist identifying areas of strength and making suggestions for improvement with any interventionist who has been observed.

## MIBLSI’s Fidelity Checklist for Phonics for Reading Third Level

This checklist was designed to coincide with the MIBLSI Focus Day training for this program. These instructional elements listed for each section below were modelled and practiced as part of this training.

The first item under the Skill column also includes a brief description of the instructional routine for that section. This is the general procedure, but there should be many opportunities to practice each section solidifying accuracy and gaining automaticity.

Level of Implementation is listed in the last column. It has a rubric rating of 2, 1, or 0. A score of a 2 would mean there was a high level of implementation. A score of 1 means medium level and a score of 0 means a low level. A score of 1 or 0 in an element should also include a written comment in the spot below to help capture what was observed and create a conversation of how to improve this area.
